Well done. I like it.

It's hard for me.

(Need an easy mode.) :). I found this title a poor substitute for the original.

The game was so dull until level 8 and then a few levels later finished with a non challenging Boss.

Even though it was a cheap title I expected a little more variation than the asteroids always spawning in the same location.

Not a terrible waste, but definitely disappointing.

Recommended for very inexperienced players (children). Cannot customize controls and default controls for the game pad are wonky. Very disappointing.. This game does not have the realistic feel of any version of the original Asteroids, not even the Atari 2600 version. The problem is the rocks themselves. They just gravitate from the top left to the bottom right, with hardly any variety of motion. If you spray them constantly with shots for a long time, they pop into a set of smaller clones in exactly the same pattern every time, and kind of just continue moving along as before. Instead of blowing up rocks in space, it feels like you're pollinating blobby plants until they give birth to successively smaller seedlings...bleech! This could all be fixed with a little math instead of hard code, but in its current form it just isn't any fun to play.
